

The Aura Flex Aluminium Channel is designed to provide a clean, durable, and professional housing solution for LED flex installations.

Engineered for both interior and exterior applications, it enhances thermal management while protecting the LED strip from dust, moisture, and mechanical damage.

Available in a range of profiles and finishes, the channel ensures seamless integration into architectural, landscape, and commercial lighting projects.

It delivers a refined aesthetic while supporting robust and long-lasting performance, making it ideal for electricians, architects, and designers seeking precision and reliability in every installation.
